Special Meeting of Lodge 127. February 13rd 1952.

The meeting was called to order at 90th

Bro Blood in the chair

Bro Colpitts was called on for notes of his office and reported that Bro Grace was taken suddenly ill and could not attend.

Also gave report on Bdsa work and read correspondence relating to this work from the officials and stated that the schedule would be strictly adhered to.

Bro Bryson introduced two grand lodge officers Bro Wilkie Treasurer Provincial Commette and Bro Graham Vice President Provincial Commette.

Moved by Bro Bennett and seconded by Bro Bryson that local lodge work be dispersed in view of our visitors from grand lodge (carried)

Bro Blood asked Bro Parris to take the chair as an old and tried member.

Bro Graham was then called upon as a representative of our ~~General~~ Provincial Commette, after a few well chosen words he made known that he would answer all questions and give his version on anything he could possibly help with.

He reported that in his idea if you are working out of a designated terminal one trip and not the proverbial two will suffice.

He also reported on the wage negotiation committee and feels sure that a very tough road is set for all concerned.

Bro Wilcie was called upon for a few words and gave report on demoted engineers and stated that all men in this category would be represented by the firemen's representative only as they would be working under our contract.

He also stated that a lot of trouble is going to arise over the starting time of yard engines as the company are trying to pool yard engine service and that the engineers committee have agreed to this procedure.

He also stated that in the wage negotiations we are asking for \$2.80 across the board or approximately 35¢ per hour or 1¢ for each point that the cost of living has risen since last increase of pay.

The meeting was then opened to a general discussion and Bro Graham & Bro Wilcie did their best to answer. A report on coal was given and there is no relief in sight as far as ^{better} coal is concerned and the only thing left is to pray for oil burns or diesels.

a discussion was held about tonnage for hand fired locomotives also on car limits and draw bar pull ~~the~~ weight on drivers was also brought up. A question was asked where the negotiations were started for our increase in pay and it was stated that the general feeling was that false impressions were given from wage increases and that it would be more to the point if we had more security for our jobs and better working conditions.

Bro Wilcie stated that wage negotiations were started in the local lodges and passed on to the general grievance committee for furtherance (this was questioned)

Bro Morrow made a suggestion that any strike action over wages be combined with the coal question also stated his wish that the general grievance committee take up the procedure of putting trains in side tracks and told to stay until further advised because of congestion of Gulmipeg terminals and that he felt men should be paid for all time spent in side track from this cause.

Bro Graham replied that schedule could not be brought up unless under schedule changes when the schedule is opened and could not be handled by the grievance committee.

A resurvey was given of men out of service as engineers and working as firemen and a very strong exception taken to the \$5⁰⁰ assessment for

the general grievance committee and that we of Northern Light Lodge No 127 feel we are not getting any consideration from said grievance committee in the form of any communications and we feel that the lead of said committee is very lax and that only the minor communications were answered.

Bro Paris thanked Bro Graham and Bro Wilcox for listening to and helping out with our trouble

Bro Paris made a presentation of a very nice radio to Bro Bryson, in token of our esteem and with a thought to the years of service he rendered to Lodge 127 and its members.

Bro Bryson thanked the Lodge for its thoughtfulness even tho it had an alarm attachment that would disturb his slumbers in the morning's. He also pledged his support to the officers and Lodge 127. Lodge was closed at 23rd.

Conciliation officer for Negotiations

Pamphlet re. Rule "S" offences

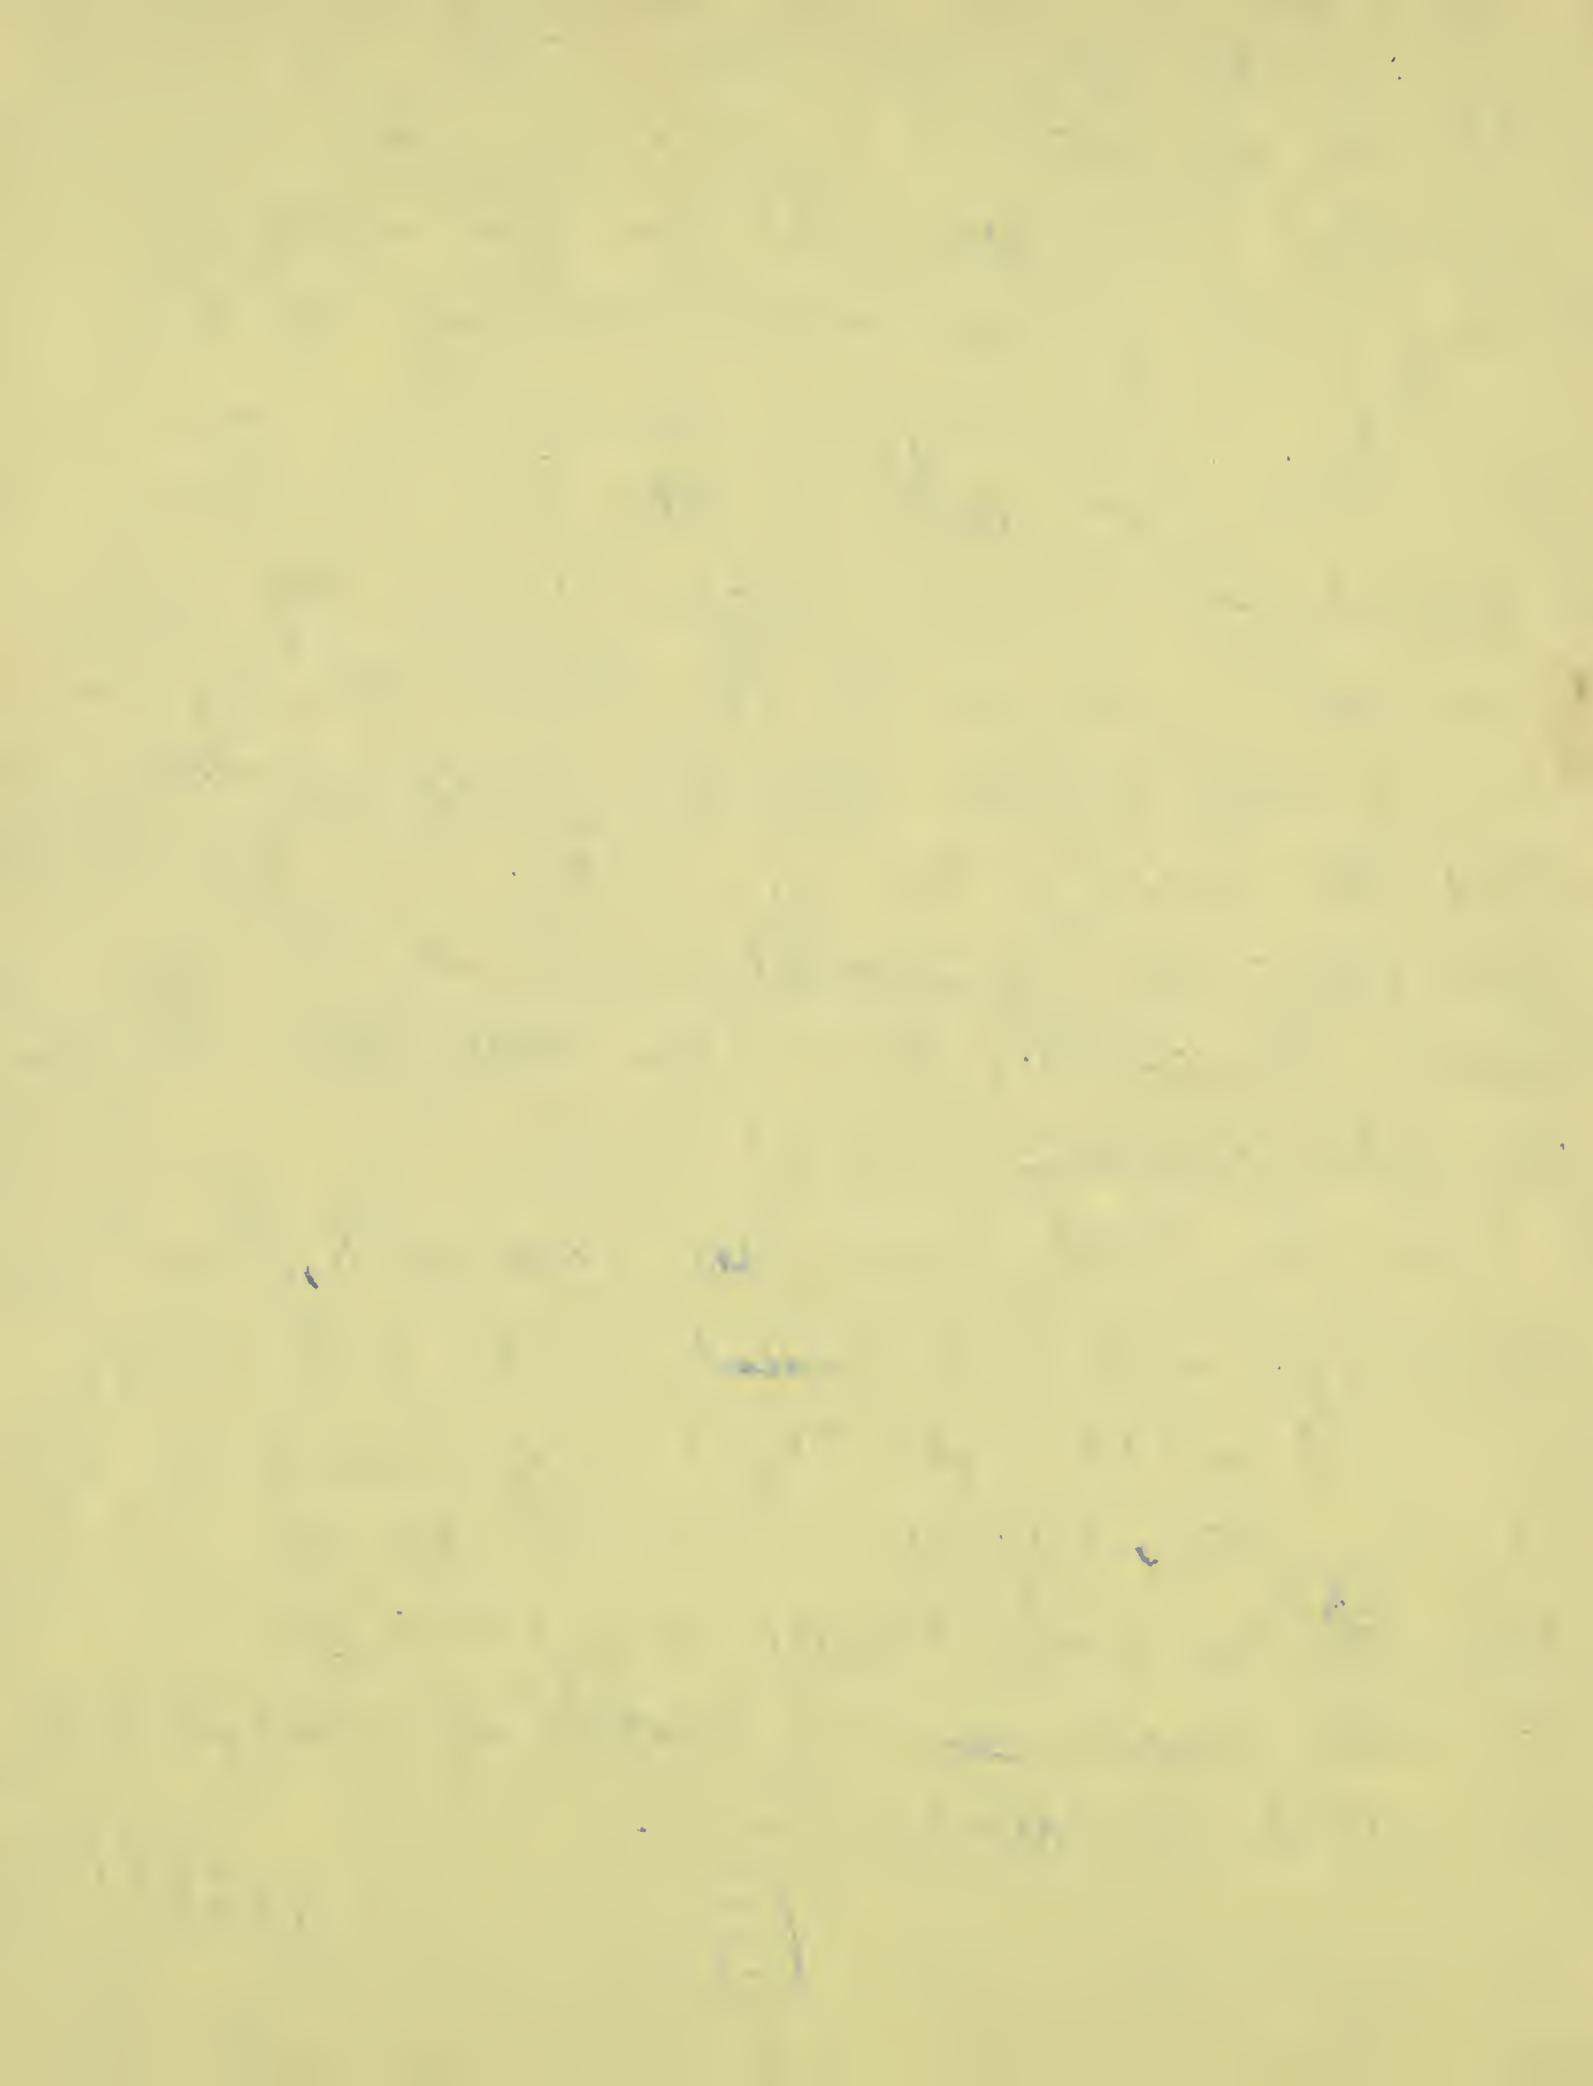

April 17

The committee was next called to Cleveland where under the International President our representation clause was drawn up, which was forwarded on opening of our present working schedule with the company. In February arrangements were made that the committee meet with the General Manager to present submissions relative to our requests. Formal notice was served for further meetings in Montreal later in Feb. but were postponed until about the middle of March. Western lines progressed from about Mar. 18 until the 22nd. At this time refusal of escalator rule along with other submissions warranted collapse of negotiations.

Minister of Labour was then applied to, for conciliation officer to assist in the conferences, who in turn through telephone conversations & later by letter, notified the members of the committee ^{of his} inability to support request for conciliator until ~~this~~ our matters were progressed through Labour Relations Board.

S.N.#3.

It is suggested that method of procedure on Eastern lines be instituted at wsg. terminals when it is desired by or stipulated that firemen attend periodic medical examinations. A formal ^{written} notification is ~~in writing~~ required

(2)

S.N. #5

In the efforts of our negotiating committee this ~~said~~ is the attitude taken if the representation issue is turned down. If on the acceptance of same there will be no need to enforce this measure. Our position as reported by brother ~~H~~T Mattingley ~~is~~ is favourable considering the outlook at the start of these negotiations. In the report to date, which ~~was~~ relative to the above, the negotiating committee in its preparation of our application to rule changes of the schedule, Mr Diefenbecker, legal counsel, expressed his opinion last October as to the right of the B of L F & E to contest the result of the certification issue and our right to represent our engineer members. In Dec. after further investigation our committee telephoned the legal counsel to ascertain his former decision. Mr. Diefenbecker reported the same and confirmed his opinions by telegraph.

On a motion passed by the members of the General Grievance Committee by Mr. Collinson of Souris and representative of Lodge 127, it was arranged that each local chairman would personally present his outstanding cases so that general chairman would receive and give advice, as well as forward submissions relative to the individual matters presented.

(1)

D) Firemen on trains 53 & 54 are advised to inform engineer of the necessity of having coal shovelled ahead, failing recognition of this, notify local chairman in writing relating attitude & arguments, if any, by Engineer. In this case same will be brought to the attention of division 76 B of L.E.

Regarding submission No. 1 of "Special Notations" it is considered that article 33G would be sufficient in progressing this matter, provided message received would state or relate to congested yard. S.
